

Session 2:

Date: 30th October 2025

Goal: Send the surveys to as many people as possible.

Actions taken: Until now, I could only send it to 4 people, with three people among them responded. Two people answered the narrative text involved form while other two answered the clinical ones.

Observations: Collecting this as a high school student with almost no resources with a minute friend group is arduous. Although, I had no expectations, this challenge makes the process harder.

Changes: None.

Next Step: Collect more surveys and present the findings with as much accurately as possible.
