

Session 3:

Date: 31th October 2025

Goal: Collect surveys.

Actions Taken: Discovered Surveyswap and added my *Narrative* text survey as all of my surveys are quite congruent except for the text part, which means that I will be allowed to only add one survey at a time to avoid confusion. The responses from previous responders have been removed.

Observations: This work requires a lot of patience and time— just as I expected.

Challenges: My forms were in Google doc's new version (The one having *Publish* option and removed *Presentation* option which prevented me to allow responders get Karma from submitting my survey.) so I had to rewrite it in Typeform, though I wish I had used Microsoft forms due to free Typeform allows only 10 responders per month and I could put it only for 50 days.

Changes: Removing previous responder's answers.

Next Step: Perhaps delete this Typeform one and make a Microsoft form.
