

Session 1:

Date: 28th October 2025.

Goal: Finish all the texts in three different writing styles: Narrative, Poetic, and Clinical. And create the forms for the required surveys.

Actions Taken: Goal done. I have completed writing the texts. The forms have been almost completed, yet not published. The texts have been based on a death case, dark topic, but that's what is supposed to make people feel vulnerable/ emotional. The questions for all the surveys, but the texts are different. Medical terms have been used rarely or explained for maximum comprehension.

Observations: Despite being involved in poetry, writing the case poetically proved to be quite difficult. Academic writing slightly clashed with poetics which made me rewrite the text multiple times.

Changes: None yet.

Next Step: Send the surveys to as many people as possible.
