

Session 4:

Date and Time: 4 PM, 29th November 2025

Objective: Wait for objective- text survey to be filled.

Actions Taken: Rewrote all my required surveys in Microsoft Forms. The survey having the objective text has been filled. The total number of respondents was 34. However 4 respondents didn't pay attention to the questions (There was an attention check question.) Ultimately, this survey has been paused and narrative text one is active.

Observations: Objective writing style unexpectedly raised high empathy (4 out of 5) and easy usually uncomplicated for the respondents. Most claimed that elements present in the text affected their empathy (4 out of 5).

Changes: Subtle changes in the session's writing style and use of Microsoft Forms instead of Typeform.

An image of the surveys

The red one has objective text, blue has narrative, and green has poetic.
